

Installed capacities

Round steps

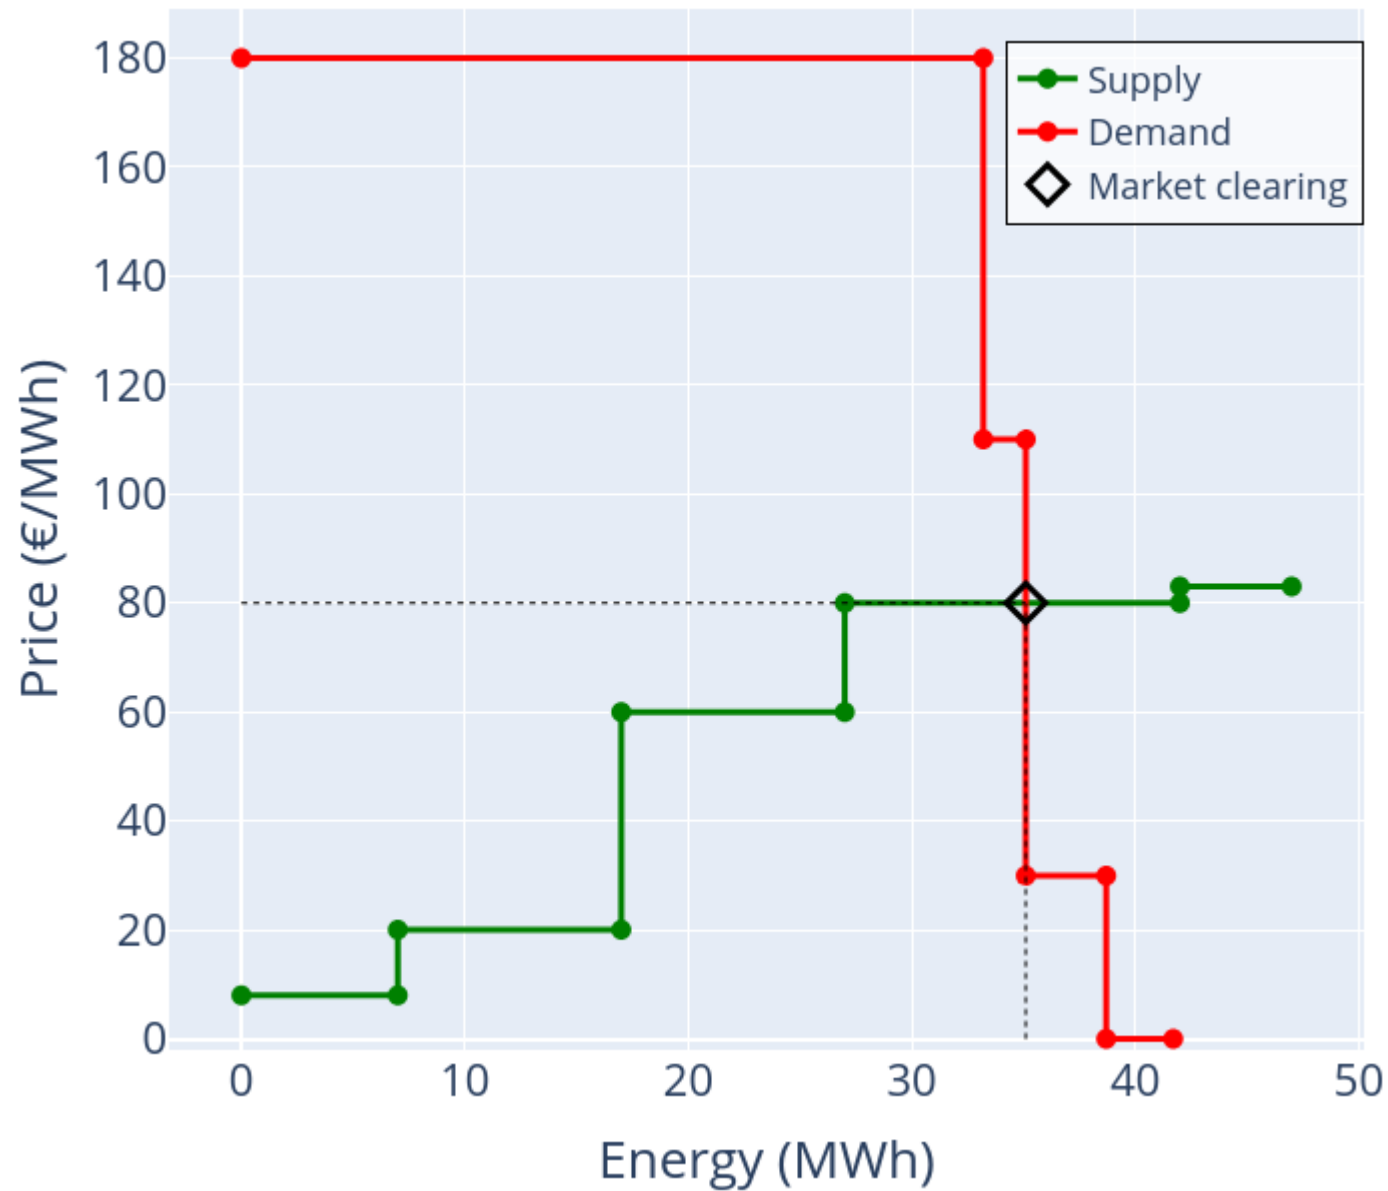

Day D-1

- 1) Public information is provided: expected demand, hydro reserves, ...
- 2) Participants privately define their bids.
- 3) The Market Operator gathers bids.
- 4) Market results are computed → **market incomes** and generation commitments

Day D

- 5) Real dispatch is observed → **variable costs**
- 6) Imbalances are computed → **penalties**
- 7) **TOTAL INCOMES** = **market incomes** - **variable costs** - **penalties**
